OFFICE POLICY

Welcome to our office. Our goal is to serve you with exceptionally friendly and prompt service and provide the best family health care available. In return, you will receive restored health. It is our experience that our patients who follow these simple guidelines obtain the best results and the greatest benefits to their health.

CLINIC HOURS

Monday, Wednesday, and Friday 7:00 AM-12:00 PM & 3:00 PM – 6:00 PM
Tuesday CLOSED
Thursday 3:00 PM -7:00 PM

Initial _____

APPOINTMENT SCHEDULING & MISSED APPOINTMENTS

We have designed a specific course of action to allow proper care necessary for spinal and postural correction. A personal appointment calendar has been designed for you to save time on each visit. If an appointment must be changed, 24 hours notice is appreciated. All missed appointments should be made up later the same day or within 24 hours. Please let our front desk know and changes will be made accordingly.

Initial _____

BROKEN APPOINTMENTS

No-show, no-call appointments are subject to a \$25 charge. Please give 24 hours notice so that we may serve others in need at your time. If appointments are repeatedly missed, we will regretfully have to dismiss you from care.

Initial _____

CHILDREN & FAMILY

Once you understand that the nervous system controls and coordinates all functions of the body and subluxation interferes with nerve flow, we expect that you would want everyone in your family checked for hidden damage in their spines. We have a cost-effective family program for you. We extend an opportunity for you to have your immediate family (within the same household) checked at a discounted fee within 14 days of starting care.

Initial _____

FINANCIAL AGREEMENTS

It is your payment that allows us to continue providing high levels of professional care, maintain our facility, and pay our staff. If for any reason you cannot keep your financial agreement, please inform us immediately to eliminate any misunderstandings. If you have the desire to receive care in our office, we will make every attempt to make affordable arrangements.

Initial _____

INTERRUPTION OF CARE

In the unlikely event it is necessary to discontinue your care for any reason, any outstanding fees become payable and due immediately to eliminate any misunderstandings. If you have the desire to receive care in our office, we will make every attempt to make affordable arrangements.

Initial _____

CHIROPRACTIC EXCELLENCE

The doctors are occasionally out of the office to attend seminars and conferences to further their education. We will build your schedule around those times. If your doctor is out of the office, another doctor may be available to see you and provide care.

Initial _____

REMEMBER

Spinal correction and healing takes time. If you do not feel satisfied with your body's responses, please make an appointment to discuss this with your doctor. We want you to get the most from your chiropractic care.

Initial _____

RESEARCH

I hereby consent for my health information to be used for research health purposes.

Initial _____

REFERRALS

The success of our office and the health of your loved ones greatly depend on your referrals. If there is someone you would like to have invited to our office, please let us know.

Initial _____

I, _____, have read and understand the above policies and agree to abide by them.

INFORMED CONSENT FOR CHIROPRACTIC

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working for the same objective. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment. You have the right, as a patient, to be informed about the condition of your health and the recommended care and treatment to be provided so that you may make the decision whether or not to undergo chiropractic care after being advised of the known benefits, risks, and alternatives.

Chiropractic is a science and art which concerns itself with the relationship between structure (primarily the spine) and function (primarily the nervous system) as the relationship may effect the restoration and preservation of health. Health is a state of optimal physical, mental, and social well-being, not merely the absence of disease or infirmity.

One disturbance to the nervous system is called a vertebral subluxation. This occurs when one or more of the 24 vertebrae in the spinal column becomes misaligned and/or do not move properly. This causes alteration of the nerve function and interference to the nervous system. This may result in pain and dysfunction or may be entirely asymptomatic.

Subluxations are corrected and/or reduced by an adjustment. An adjustment is the specific application of forces to correct and/or reduce vertebral subluxation. Our chiropractic method of correction is by specific instruments of the spine. Adjustments are usually done by hand but may be performed by handheld instruments. In addition, ancillary procedures such as physiotherapy and/or rehabilitative procedures may be included.

If during the course of care we encounter on-chiropractic or unusual findings, we will advise you of those findings and recommend that you seek the services of another health care provider.

All questions regarding the doctor's objective pertaining to my care in this office have been answered to my complete satisfaction. The benefits, risks, and alternatives of chiropractic care have been explained to me to my satisfaction. I have read and fully understand the above statements and therefore accept chiropractic care on this basis.

CONSENT TO EVALUATE AND ADJUST A MINOR

I, _____, being the parent or legal guardian of _____
have read and fully understand the above Informed Consent and hereby grant permission for my child to receive chiropractic care.

PREGNANCY RELEASE

This is to certify that, to the best of my knowledge, I am not pregnant and the above doctor and his/her associates have my permission to perform an x-ray evaluation. I have been advised that x-ray can be hazardous to an unborn child.
